Examples and installation of portable wheel and axle weighing platforms

**The best solution
for advanced industrial
applications**

Areas of use

- AGRI-FOOD INDUSTRY
- LOGISTICS (SOLAS)
- CERAMIC INDUSTRY
- MECHANICAL ENGINEERING INDUSTRY
- BUILDING INDUSTRY
- SHIPYARDS AND PORTS

Our solutions

- Quality and sturdiness are the main features of the WWS wheel weighing platforms, which have been a reference point for mobile vehicle weighing for over a decade.
- The WWS platforms, designed and built entirely in Italy, are the ideal solution for weighing road vehicles, containers, aeroplanes, bulky items with multiple support points, saving space and time. Available in type approved version for use in connection with third parties

Our network of specialised partners

- The solutions shown in the examples have been carried out by our network of specialised partners worldwide.

We thank the companies that own the photographic material for having granted permission for its use, as well as for their competence and professionalism.

If you are interested in receiving more information, do not hesitate to contact us: we will be able to advise you relating to the solution you are looking for, together with our nearest local partner.
