

CH_Weighbridge_dosage

Dosing system on weighbridges

Examples of installations and machines for dosing on weighbridges.

**The best solution
for advanced industrial
applications**

Areas of use

- AGRI-FOOD INDUSTRY
- CHEMICAL INDUSTRY
- CERAMIC INDUSTRY
- STORAGE OF RAW MATERIALS

Our solutions

- Thanks to the Dini Argeo mobile solutions, it is possible to create systems for weighing vehicles both indoor and outdoor environments, without resorting to bulky machines for installation, nor costly masonry work for installation.
- In the examples shown, the installation of the dual track DTW mobile scales took place using solely a forklift truck, which is impossible to do with conventional modular weighbridges.
- The wide range of weighing terminals enables to control advanced automation systems, for automatic vehicle loading.

Our network of specialised partners

- The solutions shown in the examples have been carried out by our network of specialised partners worldwide.

We thank the companies that own the photographic material for having granted permission for its use, as well as for their competence and professionalism.

If you are interested in receiving more information, do not hesitate to contact us: we will be able to advise you relating to the solution you are looking for, together with our nearest local partner.
